ANNUAL REPORT
2019-2020

ASHA FOUNDATION BANGALORE

ANNUAL REPORT 2019-2020

Executive Summary

This document presents an overview of ASHA Foundation's activities from April 2019 to March 2020.

The year commenced on a good note, with the organization achieving the highest possible level of accreditation from the Credibility Alliance (valid from 2019-2024). The Credibility Alliance is a body that has developed standards or norms of governance, accountability and disclosure practices in the voluntary sector to enhance accountability and transparency. Having achieved the maximum accreditation level, ASHA Foundation joins an elite list of organisations that exhibit 'desirable' norms. The organisation also attained renewal of its recognition as a Scientific and Industrial Research Organisation (SIRO) from the Department of Scientific and Industrial Research (valid from April 2020-March 2023), enabling us to continue receiving research funds.

The five service projects of ASHA Foundation sustained their impactful growth as in preceding years. A synopsis of each project's performance is given below:

HIV Counseling and Testing Services

Since inception, there have been almost 30,000 telephone counseling calls, more than a 1000 email queries and 9000 face-to-face counseling sessions, of which this period accounted for:

- 1862 telephone counseling calls.
- 509 face-to-face counseling sessions.

ASHA Foundation over the years has conducted free HIV/AIDS awareness programs for housemaids, contract labourers, metro construction workers, contract laborers, police training college trainees, garment workers, autodrivers, street vendors, anganwadis, doctors, nurses, teachers, nursing students, medical students, community health workers and laypeople, now numbering in the thousands.

The Adolescent Health Education Project

Under this project, master trainers from the organisation train teachers on issues surrounding adolescent health, and the teachers use a resource manual developed by ASHA Foundation to teach the curriculum to their students aged 13-16 years. This year:

- 180 teachers from 132 institutions in Akola, Chikaldhara and Bangalore were trained in three-day teachers' training workshops, bringing the total number of teachers trained under this project to 3500.
- 54,801 students from 546 institutions in Andhra Pradesh, Karnataka, Tamil Nadu, Kerala, and Maharashtra used our life skills curriculum during this period. The list of schools and colleges is available in Annexure 1.

The Children-at-Risk Project

This project supports HIV-infected and affected children and HIV positive men, women and families. Free medical care and consultation is provided for all the HIV positive patients, including children. The services include routine medical care, treatment for opportunistic infections, counseling services, socio-economic assessments, free or subsidised Antiretroviral Treatment (ART), free or subsidised costs for investigations, empowerment of women through Self Help Groups, educational and nutritional support for HIV infected and affected children. This year:

- 89 children received support for education (57 for school, and 32 for college and vocational training).
- There were 1929 patient visits.
- There were 11 SHG meetings. A total of 160 interest free loans have been disbursed over the years.

The Prevention of Mother-to-Child Transmission (PMTCT) of HIV Project

HIV positive pregnant mothers are identified and treated so that their babies are born HIV negative. So far, more than two lakh mothers have been tested under this project, of which 1012 were identified as HIV positive. The risk of transmission of HIV from mother to child has been reduced from 45 % to 1.85% in our cohort. This year:

- 9464 pregnant mothers were tested for HIV, of which 40 were identified as HIV positive and treated and monitored.

- Of the 38 babies born during the specified time period, 37 were tested for HIV, and all 37 were negative.

Camp Rainbow Project

Under this project, ASHA Foundation conducts five-day residential camps for HIV positive children. The camps empower these children by arming them with precise information and constructive attitudes about their condition, vastly improving their self-esteem and serving as an effective means of restoration of their dignity. So far, 488 children have attended the camp, 193 volunteers have been trained, and 113 adolescents have undergone leadership in training programs. Overall, a total of 3107 people have been influenced under this project, including campers, volunteers, adolescents, follow-up participants, caregivers, staff who care for the children at orphanages. This year:

- 92 HIV positive children attended the camps.
- 35 new volunteers were trained as staff.
- 14 adolescents (aged 18-24) attended leadership in training programs.

The research projects continue on schedule. During this period, ASHA staff attended 16 training programs and conducted 35 training programs.

The Board of Trustees of ASHA Foundation had regular quarterly meetings. The meeting in September 2019 was also attended by Mr. Ajit Isaac, M.D., Quess Corp Ltd as an invitee.

The year ended on a sad note. Our esteemed long-time colleague and coordinator of our adolescent health education project, Ms. Joyce Davis, passed away unexpectedly in January 2020. She will be greatly missed.

I would like to place on record my gratitude to our Board of Trustees, the Research Advisory Board, our long-standing supporters Mr. Krishna Chivukula and Indo-MIM Ltd., Kindernothilfe Germany, Scotland Trust, the Serious Fun Network USA, WIPRO Cares, Quess Corp Ltd., Kurian Foundation Trust and all those individual donors who contributed so generously.

Finally, I thank the staff and volunteers of ASHA Foundation for their hard work and commitment, without which the organisation could not have made such a difference in so many lives.

Dr. Glory Alexander, Director, ASHA Foundation.

OBITUARY

**Mrs. Joyce Davis – B.Sc, M.A, M.Ed, B.R.E.
05.08.1954-20.01.2020**

Joyce Davis was born in Mhou, Madhya Pradesh. She was brought up in different places as her father was in the army. After she completed her postgraduate studies, she was the principal of the Daystar School in Manali for twelve years before moving to Bangalore 2001 to take up the post of principal at the prestigious Baldwins Girls' High School. I met Joyce in 2001, when I was looking for a suitable head for ASHA Foundation's Adolescent Health Education project. Joyce joined ASHA Foundation in that capacity, and stayed with ASHA for almost twenty years, until she passed away. In that time, she contributed immensely to the work of the Foundation.

Joyce created and nurtured the Adolescent Health Education (AHE) project, shaping a major part of the Teachers' Resource Manual, and organizing and developing ASHA Foundation's teacher training workshops including the content, activities, journal writing, and recruitment of teachers for the program. She held about 65 AHE workshops for ASHA Foundation in different parts of the country such as Bangalore, Mysore, Mangalore, Chamraj Nagar, Chikamagalur, Belgaum, Nagpur, Shimla, Mumbai, Pune, Amravathi, Akola, Chikhaldara, etc. With her team of master trainers, she trained over 4000 teachers and reached about three lakh students across the country over the years. About 530 institutions and 55,000 students are currently using this curriculum. She has left behind a huge legacy and her shoes will be very difficult to fill.

Joyce was my contemporary, my trusted colleague, my sounding-board, and my friend. She endeared herself to all her colleagues with her calm, warm and friendly nature. She was a big source of strength and comfort in our times of need. She always had a word of love or humour to cheer up anyone who was feeling low. Joyce lived her life with grace, dignity and honour, and her faith was very strong until the very end. All of us at ASHA Foundation miss her greatly, and take comfort in the fact that hers was a life well-loved and well-lived.

Dr. Glory Alexander
Director
ASHA Foundation

Vision:

Our vision is to prevent HIV infection in the community and to empower and uplift people infected and affected by HIV/AIDS and other vulnerable communities

Mission:

- ❖ To build the capacity of vulnerable communities and to advocate for them.
- ❖ To provide awareness, prevention, education, training and to network effectively with all stakeholders.
- ❖ To provide counseling, testing, treatment, support and rehabilitation to people infected and affected by HIV/AIDS and vulnerable communities.
- ❖ To conduct research in all aspects of our work.
- ❖ To empower the communities that we work with.

Aims:

1. To build awareness of HIV/AIDS infection in the community.
2. To provide HIV testing in a non-coercive and non-stigmatized environment both voluntary and anonymous.
3. To train counselors in HIV/AIDS.
4. To provide counseling to HIV patients, their families and the community.
5. To provide a character based comprehensive Adolescent Health Education curriculum in schools.
6. To provide personalized, quality, medical care and palliative care to patients with HIV/AIDS irrespective of their ability to afford treatment.
7. To interact with other institutions of learning and constantly update our knowledge of the illness and to incorporate new teachings into our treatment and care of patients.
8. To network with other voluntary, state, central and other institutions including Non-Governmental Organizations to provide wide ranging care effectively
9. To rehabilitate HIV / AIDS patients and families.
10. To conduct and help research in HIV / AIDS
11. To provide specialized training for Doctors, Nurses and allied Health professionals in the field of HIV / AIDS.
12. To make a difference in the lives of patients living and dying with AIDS.

None of the Board members of ASHA Foundation received any remuneration or reimbursement during the year. Dr. Glory Alexander in her capacity as Project Director of the PMTCT project, and HIV/AIDS physician received remuneration during the year.

This report is for the period April 2019 to March 2020. The following projects were continued during the financial year:

1. The HIV/AIDS counseling services including the AIDS Helpline and Telephone Counseling service.
2. Adolescent Sexual Health Education Project named Anmol Ashayein.
3. The Children at risk project.
4. The Prevention of Mother to Child Transmission of HIV project.
5. Camp Rainbow Project.
6. Research projects- Research is integrated into every project and maybe scientific, operational, or social sciences research.

1. The AIDS Helpline and Telephone Counseling service and integrated counseling and testing service

The ASHA Foundation HIV/AIDS helpline was one of the first helplines started in the country in 1998. In the year 2011 the IVRS system was discontinued but the manual helpline which was started in the year 2000 continues till date.

HIV/AIDS helpline service and integrated counseling and testing service is one of the projects of ASHA Foundation which focuses on providing counseling to HIV patients, their families and their community. There are two manual helpline which functions on 5 days of the week from 9.00 am to 5.00 pm. It also aims at enhancing adherence to treatment and, to improve their quality of life. In addition to telephone counseling, face to face counseling is also available. ASHA Foundation is located in the urban district of Bangalore. ASHA Foundation introduced the manual telephone counseling line for HIV/AIDS in the year 2000. The project is now in its twenty first year.

Goal:

- (i) To build awareness on HIV/AIDS infection in the community.
- (ii) To provide HIV testing in a non-coercive and non-stigmatized environment both voluntary and anonymous.
- (iii) To provide counseling to HIV patients, their families and the community.
- (iv) To provide personalized, quality, medical care to patients with HIV/AIDS irrespective of their ability to afford treatment.
- (v) To train counselors in HIV/AIDS as and when required

Presently the **activities** under this project are:

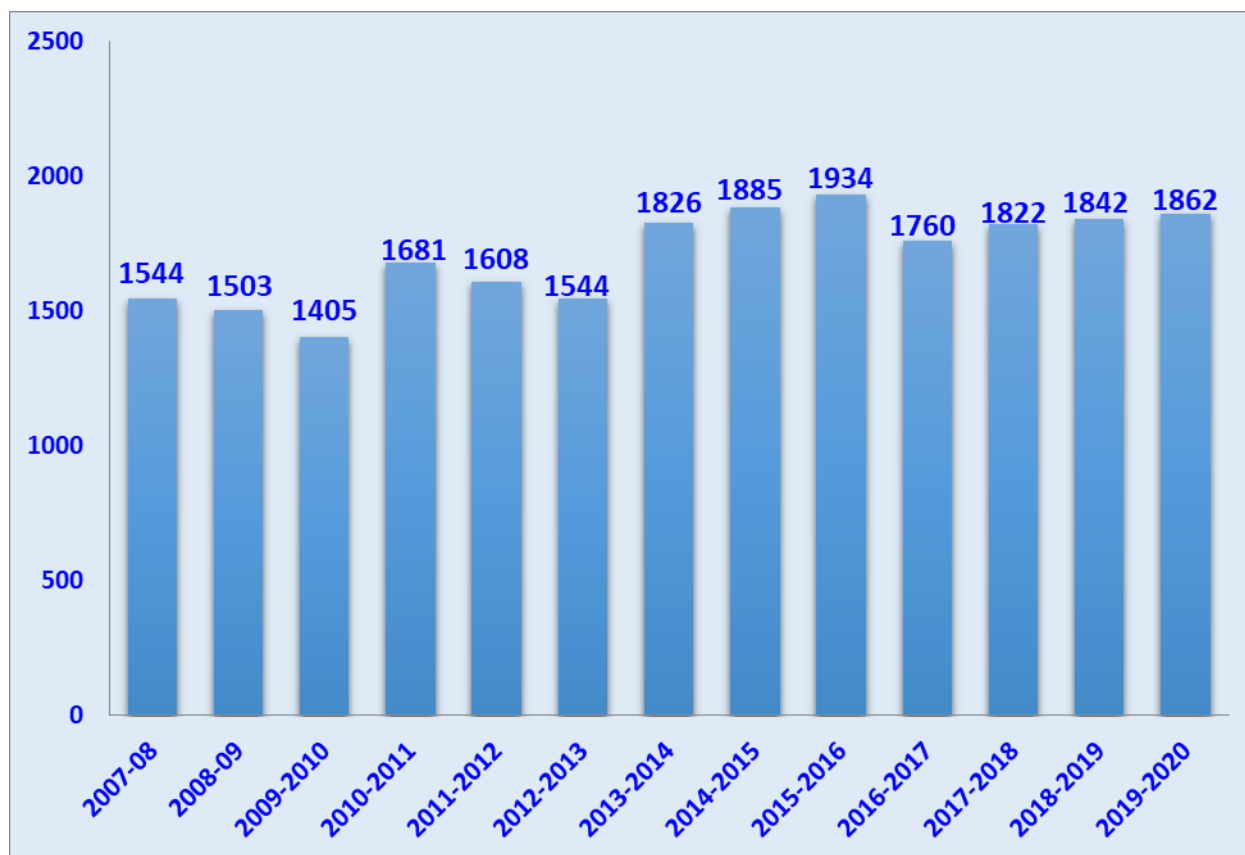

1. Telephone counseling
2. Face to Face counseling which includes the following:
 - Pre test counseling
 - Post test counseling for negative and positive persons
 - Supportive counseling
 - Family counseling
 - Counseling for ART and adherence
 - Counseling for PMTCT
 - Counseling for regular follow up/ irregularity/lost to follow up
3. Response to E mail queries
4. Awareness programs
5. Training
6. Research

Target:

- (i) To increase number of counseling sessions for adult and children by 5%
- (ii) To conduct 3 HIV/AIDS awareness session per year
- (iii) To increase the number of telephone calls by 5%
- (iv) To increase our publicity through advertisements in newspapers & poster
- (v) To increase number of email queries

ITEM	No. of Calls
Number of calls received on 23542222 & 23543333 from April 2019-March 2020	1862
Cumulative total since 2000	29566

Graphical representation of calls received on telephone helpline:

E- Mail Queries

Year	Number of queries
April 2019-March 2020	54
Cumulative total since 2008	1052

Publicity

Type of publicity	April 2019-March 2020
Newspaper advertisement	10
Number of calls from Newspaper	91
Number of calls from Poster	12
Cumulative total of Newspaper advertisement (since March 2010)	621

Counseling Details

Type of counseling	April 2019-March 2020
Pre test counseling	48
Adherence counseling	140
Follow-up counseling	253
Family counseling	67
People refd. to other services	1
Total counseling sessions	509
No. of HIV tests done	36 people not tested in window period
	(9) people came for information
No. of HIV tests Positive	22
No of HIV tests negative	21
Cumulative counseling sessions from 1998 to March 2019	9155

Awareness Programs Conducted by ASHA Foundation

Date	Topic	For whom	Venue	No. of persons	Conducted by	Timings
4.09.2019	HIV/AIDS Awareness session	Angawadi Mothers	Chennahalli	40	Priyanka. M Supriya	11 am to 12 pm
4.09.2019	HIV/AIDS Awareness session	Self Help Groups	Chikkajalla	37	Priyanka. M Supriya	12.30 pm to 1.40 pm

Over the years, ASHA Foundation has conducted free HIV/AIDS awareness programs for thousands of metro construction workers, contract labourers, police training college trainees, garment workers , auto drivers , housemaids and street vendors, anganwadis, doctors, nurses, teachers, nursing students, medical students community health workers and lay people.

Case studies in counseling:

1. An old couple of ages 69 years and 79 years came to ASHA Foundation in the year 2019.

The wife told us that she had had her uterus removed in the year 1985 for a bleeding problem.

At the time she was given blood transfusion. In the year 1994 when she wanted to visit a relative in one of the middle eastern countries she applied for a visa. The visa was not given as she was diagnosed HIV positive. Her husband tested HIV negative. Initially she and her husband went to another NGO for counseling and care but then stopped because they were worried about stigma and discrimination. Since 1994 she has not been under HIV care at all. She came now to ASHA Foundation because she had developed a cough and was worried that it was due to her HIV infection. All three tests for HIV antibodies were positive. Her husband was again HIV negative. Her CD4 counts were normal and her HIV viral load was undetectable. It is assumed that she got infected through HIV infected blood transfusion she received in 1985 since those days the HIV test on the blood bottles were not conducted before transfusion, since HIV infection had not yet been diagnosed in the country. She did not give any other risk. In spite of being HIV positive for 34 years and on no treatment for the same her viral load was undetectable. Such cases are referred to as Elite Controllers. Elite controllers are a small subset of people who can control their infection without treatment and have normal CD4 counts. She was counselled about the nature of her disease and its progress. She recovered fully from her cough with just a course of antibiotics. They were reassured with counseling.

This case is being presented for two reasons – she probably was one of the earliest cases of HIV infection in India (officially earliest case was in 1986) and two because she was an elite controller which is quite rare.

2. Umesh (name changed) first came to ASHA Foundation in the year 1999. He was diagnosed HIV positive. He was investigated, given several rounds of counseling for adherence to ART medication and started on ART. He followed up with us till 2001 and was irregular on treatment in spite of repeated counselling sessions. Finally he stopped coming altogether in 2001. He returned to ASHA Foundation in 2019, 18 years later and was found to be still irregular on treatment with ART, moving from one doctor to another, till he finally had become resistant to all the routine ART medication and now had to spend almost Rs 20,000 per month on ART which he just could not afford. So in frustration and with fear he returned to ASHA Foundation after 18 years and pleaded that he would take his medicines regularly because he did not want to die. Again he was repeatedly counselled. His CD4 counts were low and viral load was high. He

was put on relevant medication at a reasonable rate and has been on regular follow up for a year with us. His viral load is undetectable and he has put on almost 10 kgs in weight.

This case is being presented to demonstrate the importance of adherence to ART in HIV Infection. If one is irregular with medication, and casual about treatment then a time will come when there are no options left or the options become very expensive. In a challenging case such as this one it requires a near death experience for the patient to understand the importance and change for the better.

2. Adolescent Health Education

Adolescent Health Education is one of the projects of ASHA Foundation which was launched in the year 2000. The project involves the empowering of adolescents so that they can face the challenges of their future. The project started with the empowering of students in the area of preventing HIV/AIDS which was a threat to adolescents. As years passed on other challenges of smoking, substance abuse, alcoholism and suicide ideation have become a source of threat.

It was perceived that adolescents given social / emotional education, like the one developed by ASHA Foundation, could face all manner of challenges. But as we see the present scenario it seems that Education in its narrowest sense does help adolescents to face the future. *The 2018 World Development Report on Education: A Critical Analysis*. Titled **Learning to Realize Education's Promise** Washington views that the World Bank economist have (World Bank, 2018. 216 pp (Klees et al., 2012) continued to reflect a narrow view of education because it does not take into account the global concern of equity among men and women. Respect and responsibility do not feature in the educational system because only the cognitive achievement is measured and appreciated. But development of non-cognitive skills is equally important because both these skills together play an important role in human capital development and workforce success.

The strategy involves empowering adolescents with life skills and build character in the school going years. Therefore the people involved in the program are Institutions, school leadership, teachers, parents, students and ASHA Foundation.

In the year 2019 – 2020 the following work was done to fulfill the goal of Adolescent Health Education. The starting point is the training of teachers who then teach the program to the students.

This program trains teachers in a three- day workshops. The strategy is to train teachers who would facilitate this process for their students in their schools. Volunteers and others have done this for out of school youth too.

These teachers go back to their schools and in consultation with the school leadership implement the program in their schools. To make this value teaching realistic there is a peer and parent component. The guideline for this is provided to the teachers at the teachers' training workshop. Each lesson has its peer and parent's component.

The value teaching is structured to help children walk the talk not only for teenage years but these skills are learnt for life.

Topics being dealt with are related to friendships, relationships, marriage, sex in perspective, life skills and correcting the course if students have made mistakes.

The aim of this program is to empower young people in character and practice and develop life skills.

The role of ASHA Foundation is to provide the training for the teachers along with the resources for both students & parents along with technical assistance by way of follow up.

The Curriculum

The curriculum fills the gap in the school system so that the emotional development of young people is addressed.

The curriculum is a flexible one and schools are able to implement the program in their time-table with their own staff.

Targets for the year:

- 1.To conduct at least three teachers training workshops in life skills during the year
2. To train at least 150 teachers during the year
3. To increase the number of students doing the program by 5000 students per year
4. To train teachers from Tribal schools in Chikhaldhara, Maharashtra. Tribal group is the Korku Tribe

The **Korku Tribes** are an Adivasi ethnic group predominantly found in the Khandwa, Burhanpur, Betul and Chhindwara districts of Madhya Pradesh and adjoining areas near the Melghat Tiger Reserve of Maharashtra. They speak the Korku language, which is a member of the Munda languages and is written using Devanagari. They are classified as a Scheduled Tribe by the Indian government.

Korkus have derived their name from the combination of the word 'koru' meaning man and 'ku' which makes it plural meaning tribal men. The Korkus are a Munda tribe and live near a Dravidian-speaking tribe — the Gonds. The Korku people are initially believed to be a hunter-gatherer community who dwelt in the forests of the Satpura Range on both sides of the Tapti River.

The Korku tribe lives in small groups of huts made of grass and wood. Every household has elevated stage like structure in the front side of the house. This elevated stage is used as a storage space of farm produce such as cattle feed. They socially consume liquor made from the flowers of the Mahua tree which is prepared in almost all the houses. Predominantly, a rural-based community with 97% living in rural areas, Korkus are primarily cultivators.

Wooden pillars erected from the floor are the main base of the house they make. The roof is thatched with bamboo frames and hand made tiles. Bamboo mats form the skeleton of the walls which is smeared with mud. There they lay their heads dreaming about a better tomorrow.

Whilst they share the love of the forests with the Gonds, they are also excellent agriculturists and Korkus in Bhainsdehi tahsil of Betul district of Madhya Pradesh have pioneered the cultivation of potato and coffee. In their traditional festivals of Hari and Jitori, they celebrate a month long planting campaign. In this way they combat malnutrition and environmental degradation.

The community is the home to a unique and distinct culture, possesses a rich heritage of age old traditional systems more pertinently in terms of indigenous knowledge, beliefs, customs and social system. Traditional representative body of the society known as 'Korku Panchayat' is found in many villages. Headed by a chief known as *Patel*, other members in the Panchayat include *Padihar* (priest), *Kotwar* (Chaukidar) and ten to twelve older male members of the community known as Panch. It plays a decisive role during traditional occasions mainly in festivals, marriages and intra- and inter-village conflict resolutions.

Known for poverty, hunger, malnutrition, mass-scale exploitation by moneylenders and traders, the community confronts numerous socio-economic challenges in the day-to-day life partly due to the poor natural resource bases. Agriculture though the primary source of livelihoods for most of the community members, many of them earn their livelihoods seasonally employed as agricultural laborers.

The children of the Korku tribes attend Government schools and the management responsible for these schools expressed interest in teaching the ASHA Foundation Life Skills program to the children of these schools.

In December 2019, 79 teachers representing 79 schools from Chikaldhara attended the workshop Conducted by ASHA Foundation.

Teachers training workshops conducted in the year 2019-2020 are as follows:

No	Date	Topic	Name	Venue	No. of institutions	No. of Teachers
1	18-07-19 20-07-19	63rd Teachers Training workshop	Bangalore Teachers Training workshop	ASHA Foundation premises	12	18

Refer Annexure 11 for feedback from teachers, students and parents on AHE

Children at Risk Project

Targets for the year:

1. To provide educational support to at least a hundred HIV infected and affected children.
2. To continue ART support and support for investigations for the socially disadvantaged HIV infected children , women and men
3. To conduct 12 SHG meetings for our HIV infected and affected women per year.

The components of the children at risk project are:-

1. Medical, nutritional and educational support for children.
2. HIV/AIDS outpatients' clinic three times a week.
3. Empowerment of women through SHGs

4	Celebrations and Events	Planned for a carnival in the month of March 2020 but was cancelled due to COVID 19- - - - -

The KNH-CAR project supports the medical, nutritional and educational support for children infected and affected by HIV/AIDS.

The following activities were undertaken:-

To improve the educational status of children infected and affected by HIV/AIDS:

As the part of the educational support, during the period, 89 children were supported for their education. Details as follows:

ELC (Early Learning Centre) Lkg and Ukg	06 (04 Girls and 02 Boys)
PE (Primary Education) 1 st std to 7 th Std	32 (18 Girls and 14 Boys)
SE (Secondary Education) 8 th std to 10 th std	19 (11 Girls and 08 Boys)
HE (Higher Education) 1 st PUC to Degree	32 (11 Girls and 21 Boys)
Total	89 (44 Girls and 45 Boys)

To improve the health status of the children infected and affected by HIV/AIDS and their families:

HIV Testing

During the period, totally 63 HIV tests have been done including testing on 29 children. Out of this 16 have been reported positive, of which 9 adults were male, 5 adults were female, and 2 were children of which one was a female and one was a male child.

HIV/AIDS Clinic

Children:

ASHA Foundation conducts a HIV/AIDS clinic thrice a week on Mondays, Wednesdays & Fridays afternoon from 1.30 pm to 5.00 pm. Totally the clinic operates for 144 days. The medical team consists of Physician, Pediatrician, Counselors, Nurse, Project Coordinator, Medical Social worker and clinic support staff. Free Medical care and consultation is provided for all the HIV Positive patients and all children infected by HIV/AIDS. The services include routine medical care, treatment for opportunistic infections, counseling services, socio-economic assessment and free or subsidized Antiretroviral Treatment (ART)

Presently 50 children are receiving ART treatment out of which 41 are on the first Regimen, 6 are on the 2nd Regimen and 3 are on the 3rd Regimen and remaining 9 children are to be started on ART. All these children have increased CD4 Counts and their quality of life is good.

Two children have been started on ART during the period. Totally 321 children visits occurred to the clinic. 69 times children received CD4 investigation support and 29 times children have received support for various investigations like CBC, ESR, Hemoglobin, Differential count and Blood Picture, S. Creatinine and Culture SGOT and SGPT, HbsAg, HCV, Liver Function test.

Adults

Totally 243 adult patients are on ART. Ninety-one patients have undergone CD4 test and 23 patients have been started on ART during the period. Forty-six patients received other investigations.

To improve the Socio economic status of the children and their parents infected or affected by HIV/AIDS

Self Help Groups:

Six Existing Self help Groups (117 members) are there which have been formed under the guidance of ASHA Foundation with an average of 18 to 24 members in each group. Regular meetings are being held every month and minutes are maintained. The six groups are: Shrishti, Trupti, Preethi, Prakruthi, Nisarga and Nesara. Nine beneficiaries have utilized the loan facility during the period, totally 160 times beneficiaries have taken loans amounting to Rs 6, 88, 000 (Six Lakhs Eighty eight thousand only). Out of this amount, 120 loans were cleared and Rs

98,740.00 (Ninety eight thousand seven hundred and forty only) is the outstanding loan amount still being paid by 40 beneficiaries. They have been part of the group for the last eight years. They meet on the third Sundays of every month.

SHG Topics covered during the period as follows:

- Primary and Higher Education support
- Information on Government schemes (Anthodaya Anna Yojana Scheme, Right to Education, Higher Education and Scholarship, Dhanashree Yojane, Manasvi Yojane)
- Documentation about SHG Meeting minutes.
- Information about Pradhana Mantri Ujwal Yojana and Health Card.
- Information about Viral load testing related to HIV
- Adherence about ART medicines
- Importance of periodic papsmear testing.
- Assessment for WIPRO primary and higher education children.
- Sharing of Annual Report of ASHA Foundation-2018-2019.
- Information about 1st, 2nd and 3rd Regimen of ART medicines.
- Information about ASHA Carnival

SHG meeting was not conducted in the month of March-2020 due to COVID-19.

Dry Ration Support:-

Thirty six HIV positive families with children were supported with dry rations. Each package of dry rations consists of 6 kgs rice, 1 kg Atta, half a kg green gram, 1 kg oil and half a kg dhal.

Case study -1

Kritika (name changed) is just three and a half years old. She was diagnosed HIV positive in our organization for the first time about a year ago. Her story is rather sad. Her mother had lost her first husband about twelve years ago from HIV Infection. Somehow the mother was not tested at the time of her husband's death. At that time she already had a daughter from her first marriage who was five years old. Five years after losing her first husband, she got married to another man and soon became pregnant. The HIV test was done in a small nursing home and reported as negative. The mother went through the pregnancy and delivered a girl baby who was healthy. Two years later she became pregnant with a third child and during this pregnancy she was tested for HIV as usual but was found to be

positive. She was referred to ASHA Foundation and multiple HIV tests confirmed the diagnosis. As is the routine we tested the husband and he was negative. We tested the first child from the first husband and she was negative. We then tested the first child from the second husband and this child was HIV positive. We confirmed the diagnosis and her viral load of HIV was also high at 2,28,000 copies/ml. The father was heartbroken and we had to explain to him that the HIV test done on her mother during that pregnancy was a false negative test. The mother now pregnant with the third child was started on ART -she completed the pregnancy and delivered a healthy male child who is now 10 months old and HIV negative. Krutika was started on ART and she tolerated the medication well and is on her sixth month of treatment . She is doing well. The tragedy is that her mother was tested in a small nursing home where the test was reported negative and Kruthika was born HIV positive as a result of that. This could have been easily prevented through a repeat test and putting the mother on ART at that time. This case is being presented to show that a improperly conducted HIV test resulted in the birth of a HIV positive child. We hope that with ART this child will continue to do well and be able to lead a normal healthy life.

Case Study -2

Bharathi is a 48 yrs old widow. She first came to ASHA Foundation more than twenty years ago along with her husband who was very sick. At that time ART was not available. He was referred to a bigger hospital for admission and he died there. Bharathi continued to visit ASHA Foundation regularly for follow up. At that time her CD4 counts were normal and as per the guidelines then, she was not put on ART. She had one child a girl, who was 5 years old at the time and HIV negative. When Bharathi's CD4 count was low she was started on free ART at ASHA Foundation. She also received dry ration support and educational support for her daughter. Today her daughter is 25 years old, and has completed her masters in Computer Applications. She is working in IBM. She receives a salary of Rs.24,000 per month. Bharathi is also maintaining good health on ART and she is on regular follow up with us. This case is being presented to show the long term commitment of ASHA Foundation towards the patients and a HIV affected child of five years who is now 25 years old, and working and helping her family economically.

4. The KNH-PMTCT Project-Prevention of Mother to child Transmission of HIV Project

The Indian government is committed to eliminating new HIV infections among children. The country's Prevention of Parent to Child Transmission of HIV/AIDS (PPTCT) program started in 2002. As of 2017 almost 30,000 sites were offering PPTCT services. Based on 2013 WHO Guidelines, the program initiates lifelong antiretroviral treatment for all pregnant and breastfeeding women living with HIV regardless of CD4 count or stage of HIV infection.

The NACO Technical Estimate Report (2015) estimated that out of 29 million annual pregnancies in India, 28,000 occur in HIV positive pregnant women. In the absence of any intervention, an estimated (2015) cohort of 8,400 infected babies will be born annually. The PPTCT program aims to prevent the perinatal transmission of HIV from an HIV infected pregnant mother to her newborn baby. The program entails counseling and testing of pregnant women in the ICTCs.

With effect from 1st January 2014, pregnant women who are found to be HIV positive are initiated on lifelong ART irrespective of CD4 count and WHO clinical Staging; their newborn (HIV exposed) babies are initiated on 6 weeks of Syrup Nevirapine immediately after birth so as to prevent transmission of HIV from mother to child and is extended to 12 weeks of Syrup Nevirapine if the duration of the ART of mother is less than 24 weeks.

The HIV exposed baby is initiated on Cotrimoxazole prophylaxis at 6 weeks and is tested for HIV DNA PCR at 6 weeks by DBS (Dry Blood Spot) collection. If the DBS sample is positive for HIV DNA PCR, then a repeat DBS sample is tested for HIV DNA PCR. The HIV exposed baby is then initiated on lifelong ART at the earliest if confirmed HIV positive through 2 DNA PCR test.

Fifteen countries around the world have received validation from WHO for elimination of Mother to Child Transmission of HIV (E-PMTCT). India is not one of them. Much effort is going on by the stake holders to make India also validated for EPMTCT. In India out of the total 29.7 million women who get pregnant every year, about 23,000 mothers are estimated to be HIV positive. Of these about 60 % are on ART. The PMTCT coverage about 70%. It is important that all stake holders make maximum effort to eliminate MTCT from India over the next few years.

Organizations like ASHA Foundation continue to promote PMTCT and identify HIV positive pregnant mothers for treatment.

The PMTCT program has had a good impact in that over the last three years we have not had a single newborn child that has been HIV positive in all the newborns tested so far.

Goal: Elimination of new HIV infection among children

Objectives:

Overall project objective

- To contribute to the WHO Global Goal of elimination of mother to child transmission of HIV (E-MTCT)

Sub- objective- 1

- To decrease the incidence of HIV infection in children born to HIV positive mothers from 45% to less than 5% in our project

Sub- objective-2

- To prolong the quality and quantity of life of the HIV positive pregnant mother so that she can take care of her infant and provide the child with a normal childhood as his right.

The target groups to whom the services are provided are:

1. All pregnant women attending antenatal clinic's in our partner hospitals for routine HIV testing
2. All pregnant women screened at other centers, accessed by outreach worker where PMTCT services are not available.
3. All identified HIV positive pregnant women in above two groups
4. Infants born to HIV infected, by providing infant ARV prophylaxis, counseling on infant feeding practices, infant testing, immunization and co-trimoxazole prophylaxis.
5. Spouses of all HIV positive pregnant women

The Essential PPTCT Services includes:

1. Routine offer of HIV counseling and testing to all pregnant women attending antenatal clinic in our partner hospitals
2. Ensure involvement of spouse & other family members
3. Provision of lifelong ART (TDF +3TC + EFV) to all pregnant and breastfeeding HIV infected women regardless of CD4 count and clinical stage
4. Promote institutional deliveries of all HIV infected pregnant women
5. Provision of care for associated conditions (STI/ RTI, TB & other Opportunistic Infections -OIs)
1. Provide nutrition counselling and psychosocial support to HIV-infected pregnant women
2. Provide counselling and support for initiation of exclusive breastfeeds within an hour of delivery as the preferred option; continue BF at least for one year for those infants with negative HIV status (Early Infant Diagnosis Protocol) and 2 years for HIV positive children Provide ARV prophylaxis to infants from birth upto minimum 6 weeks
7. Integrate follow-up of HIV-exposed infants into routine healthcare services including immunization
8. Ensure initiation of Co-trimoxazole Prophylactic Therapy (CPT) and Early Infant Diagnosis (EID) using HIV-DNA PCR at 6 weeks of age onwards as per the NACO EID guidelines

Targets and activities for April 2019-March 2020

- To provide counseling and HIV testing to at least 10,000 Pregnant mothers per year.
- To provide PMTCT services to at least 40 HIV positive pregnant mothers per year.
- To provide treatment, follow up and testing to 40 newborns.
- To decrease the risk of transmission from 30% to < 5% in our cohort.
- To conduct trainings for nurse counsellors and doctors
- Site Visits.
- Maintenance of records and data entry

Activities based on Specific objectives

Specific Objective-1:

To decrease the incidence of HIV infection in children born to HIV positive mothers from 45% to less than 5% in our project

Activities-1 :

Consent and testing pregnant mothers for HIV infection

Output 1:

Nine thousand four hundred and sixty four pregnant women were tested for HIV infection this year(Target 10000) after consent

Use of Output Activities 1

Nine thousand four hundred and sixty four pregnant women realised importance of HIV testing and performed the HIV antibody test

Activities-2

Identifying and treating HIV positive pregnant mothers with ART during pregnancy/delivery/breast feeding periods

Output 2

Forty HIV pregnant mothers were identified as HIV positive this year(Target for this year 40)

Use of Output Activities 2

- Forty HIV positive women became knowledgeable and have undergone PMTCT services and thereby
- Became knowledgeable on HIV infection
- Became adherent to ART through out the pregnancy,delivery,breastfeeding and lifelong
- Became knowledgeable on exclusive breast feeding for 6 months and complementary feeding to be added at 6 months
- Understood that Nevirapine syrup has to be given to baby for 6 weeks to prevent post delivery transmission of HIV
- Under stood that HIV testing to baby has to be done at 6 weeks,interim period and at 15-18 months

Activities-3

Starting /continuing them on ART

Output 3

Out of 40 pregnant women 18 women started ART during pregnancy and 22 women were already on ART when they became pregnant.

Use of Output Activities 3

Forty pregnant women understood the importance of taking ART during pregnancy, post pregnancy and lifelong

Activities-4

Monitoring the delivery process

Output 4

- Thirty nine HIV positive pregnant women delivered in hospitals during 2019-2020
- Of this 25 women were diagnosed in 2019- 2020, 14 women diagnosed in 2018-2019 but delivered in this year. Thirty two women had caesarian section and seven had normal vaginal delivery

Use of Output Activities 4

Thirty nine women understood the importance of delivery in hospital settings because they were HIV positive and completed delivery in hospital.

Activities-5

HIV testing at periodic intervals in our newborn babies born to HIV positive mothers

Output 5

- Thirty eight new born babies were born this year to HIV positive mothers in 2019-2020
- One baby still birth.
- Thirty seven babies had 6 weeks PCR in this year
- Out of 38 new born babies born this year 32 tested HIV negative
- Remaining 6 babies 5 babies still not reached the age of 6 weeks (born in March 2019)
- One baby lost to followup
- 37 babies are under follow up .
- 30 babies were due for final test, 26 babies completed final test and all were HIV negative. Of the remaining 4, 1 lost to followup and 3 are still due.

Use of Output Activities 5

- Thirty eight mothers understood the importance of HIV testing in babies and followup regularly to do the HIV testing in babies at 6 weeks.
- There has 97.4% followup for 6 weeks PCR.
- There was 97% followup for final HIV test and all were HIV neg.
- The incidence of HIV infection in newborns born to HIV positive mothers was reduced from 45% to 0% in this financial year in all those who were tested.

Specific Objective-2

To prolong the quality and quantity of life of the HIV positive pregnant mother so that she can take care of her infant and provide the child with a normal childhood as his right.

Activity: 1.

Counseling to pregnant mothers on importance of taking ART lifelong, even after delivery

Output:1.

Forty HIV positive pregnant women identified and received counseling

Use of output

Forty HIV positive women understood the importance of taking ART lifelong and are doing so

Activity-2.

Ensure that the mothers continue their ART at the primary/referred hospital or ART centre private or govt.

Output:2-

- Out of 30 mothers who needed to be regular followup after final testing of their babies 29 mothers are continuing their ART at ASHA Foundation, Bangalore Baptist hospital, Govt ART centres.
- There is 97% followup of mothers after final testing of the babies

Use of output

HIV positive pregnant mothers understood the importance of lifelong ART and regular followup and are doing so.

The table below gives the year's and cumulative statistics.

Particulars	KNH PMTCT April'19-March'20	ASHA PMTCT Cumulative Jan '03 – Mar2020
Total no. of deliveries	8,765	1,99,281
Total no. of ANC women registered	9,544	1,89,877
Total no. of women counseled	6,696	1,92,721
Total no. of women tested	9,464	2,05,027
Total no. of antenatal women identified HIV positive	40	1,012
No. of liveborns	38	846
Total no. of women awaiting delivery	12	12
Eligible women treated	40	817
No. of babies treated	38	825
PCRs or ELISAs done	37	709
Positive PCR	0	13
Negative PCR/ELISA	37	695
Babies had final 3 antibody test under EBF at 15 months	27	115
Babies had final 3 antibody test under ERF at 15 months	2	10
Transmission rate		1.85%

Awareness among health care providers was increased among the hospitals as follows:

People Sensitised	By Trained Doctors/Counsellors in their Hospitals April19-March20	Cumulative Total
Doctors	13	317
Staff Nurses	62	2872
Nursing Students	6	4608
Ward Aides		1552
Para medicals and Community Workers	25	566
Community	90	10136
Total	196	20051

Our outreach worker visited 41 new institutions (Maternity homes, Clinics etc) and 403 old institutions including Govt centers during this financial year to inform about ASHA foundations PMTCT programs and identify HIV positive pregnant women.

The hospitals that have sustained the project on their own and are receiving only technological help, with financial support as needed for the care of HIV positive identified in their hospitals, IEC material and training of counselors are:

1. St Joseph's General Hospital, Guntur.
2. Women's Hospital, Ambajipeta.
3. The Bangalore Baptist Hospital, Karnataka
4. Church of South India Hospital,Bangalore,Karnataka
5. Seventh Day Adventist Hospital, Bangalore Karnataka
6. Rural Health Training Centre, Kazhakuttom.
7. GnanaduraiHospital,Sivakasi,Tamil Nadu

Project staff's representations of target group's network

Case study -1

Nirmala (Name changed) had been married for five years and then lost her husband to HIV infection. She was not tested. She also had a five year old daughter at the time. About five years later she met a man at a marriage function and the man expressed a desire to marry her, knowing that she was a young widow with a child. She agreed and they got married. Shortly thereafter she got pregnant and a HIV test done elsewhere during this pregnancy was negative. A healthy girl child was born from this pregnancy in another hospital. Two years later she became pregnant with her third child. At this time, her HIV test was done during her pregnancy elsewhere and the report came as HIV positive. She and her husband came to ASHA Foundation. Wife was

confirmed HIV positive. Husband was HIV negative. Her daughter from her first marriage also tested HIV negative.

But the second child who was two and half years old now surprisingly tested HIV positive. This was further confirmed by three tests. The mother was treated during this pregnancy with ART and delivered a live healthy boy whose 6 weeks and 6 month HIV test is negative. The child is now one year old and due for 1 year test. The two and half year old girl had a HIV viral load of 2,28,000 copies/ml. She is also on ART and doing well. This case is being presented to show that the HIV test done in some other non standardized lab at a hospital showed a false negative during the mothers second pregnancy and as a result of which the baby was born HIV positive and this could have been easily prevented. It was a very unfortunate incident.

Case study-2

Susheela, (name changed) is 37 years old and HIV positive. She came with her fifth pregnancy. Her husband is HIV negative. The first and third pregnancies were aborted. The second pregnancy resulted in the birth of a girl baby who is 12 years old and HIV positive too. The fourth pregnancy resulted in the birth of a boy who is HIV negative and two years old. She was on ART for that pregnancy and continued the same and became pregnant with the fifth child when she came to us. We found that she was not regular with her ART and counseled her on 100% adherence. Her viral load fell from 7162 copies, to 2960 to 1290 copies done three times during her pregnancy. We tried changing her ART to other drugs near her due date but she could not tolerate the new medication, so we reverted to the old medication. Ten months ago she was delivered by Caesarian section and had a healthy baby girl who is now 10 months old and HIV negative. This case is being presented to show that in spite of being HIV positive she became pregnant five times, she also was on the older side (37 years), had high blood pressure , and had a detectable viral load which worried us. She was huge challenge but the outcome was successful in that she had a negative baby and also underwent tubal ligation. Today this baby is HIV negative at one year and doing well. Susheela's viral load has been going up again and the resistance testing showed that she is resistant to all the first line group of drugs and the ART medication had now been changed.

5. Camp Rainbow:

Introduction on Camp Rainbow:

Camp Rainbow is a psychosocial program to provide opportunities for children living with HIV and other serious illnesses to participate in HIV education, traditional camp activities through the vehicle of residential and day camps. It aims at enhancing campers' adherence to treatment and medication, to improve their quality of life with the focus on primarily providing children with serious fun! We also ensure that they increase social peer relationships. Overall, it reduces stigma and discrimination within the community as we invite youth to participate in this structured program as camp staff.

The program is called Camp 'RAINBOW' because Rainbow has colors and children love colors. Also in many civilizations 'RAINBOW' is a symbol of hope. Similarly through our Camp program we would like bring in a sense of hope and better future in the lives of the children living with HIV.

These structured psychosocial programs are in collaboration with the SeriousFun Children's Network, USA, started by actor Paul Newman. The SeriousFun Children's Network evolved from their year round camps in US and Europe to a Global Partnership Program serving children in Africa, Asia and South America.

Preliminary findings from other GPP sites in Ethiopia and Vietnam indicate that camp may have an effect among children on HIV knowledge, antiretroviral treatment adherence and attitudes, coping with stigma, resilience, and most prominently, social relatedness, as children who may lead isolated lives and face discrimination can play and interact in a safe environment with HIV positive peers and compassionate adult counselors/care providers. The increasing feedback from Camp Rainbow campers and their caregivers has enhanced the commitment to increase the reach of Camp Rainbow to more children living with HIV and those with other serious illnesses in other parts of India through the strategic partnership with SeriousFun called the India Partnerships Initiative (IPI).

2019 was the sixth year of Camp Rainbow Bangalore. In the past 6 years, 488 children have been served through Residential camps. About 1205 children, 413 caregivers have

been served through outreach program that includes follow-ups and re-union program. Also 113 young adolescents have been part of the older adolescent program so far. Children from various institutions like ASHA Foundation- Bangalore, Freedom Foundation-Bangalore, Sneha Care Home-Bangalore, ACCEPT Care home-Bangalore, Snehalaya Children's home-Mandya, Amma Mane-Mysore and from different Positive Networks like KNP+/ANP+-Bangalore, Anandajyothi Network- Mysore, , Adarshajeevana Network-Mandya, Ramnagar Network, Navajeevana trust-Kolar, Chirajeevana Network-Tumkur, Chikballapur Network, have participated in camp.

The volunteers participated in camp have also been from different colleges in Bangalore like St.Joseph's College, Christ University, South Asian bible College and Mount Carmel College. However the majority of the volunteers have been from St.Joseph's College and Mount Carmel College. So far about 193 volunteers have been trained through residential camps and 544 trained camp staff, 112volunteers have participated in the different camp program like follow-ups and Re-unions. We have also been getting medical staff for the program from Bangalore Baptist hospital. In the year 2019, 92 children and 35 volunteers participated in the Residential camp program.

The Camp planning for the year 2019 started from January wherein the leadership team coordinates with different Positive networks for campers. The team then gives orientation for caregivers about the program, an application form is filled, and a consent taken from caregiver, followed by medical screening for children. The criteria for children to attend camp are:-Should be aware of HIV status, CD4 count should be above 250cells. Once the screening is done the caregiver would be told if he/she is selected for camp or not.

The volunteers also follow a similar process. Presentations are given at different colleges. Interested participants sign-up and are called for an interview at ASHA Foundation. Following interviews referral checks are done after which the confirmation of participation is given to the volunteers. The criteria for volunteers to be a part of camp are: Aged-19yrs and above, should be able to communicate in local language Kannada and willingness to give 3 weeks of their time.

Camp provides opportunities for children to develop new skills, make new friends and also increase their confidence level. At camp, various activities like Arts & Crafts, Team-

building, Nature & Discovery, Life-skills and Performing Arts. Another very important aspect of the camp is providing the children with knowledge on HIV, ART medicines and also providing a space for them to ask any questions relating to their medications or any question relating to living with HIV.

Other than residential Camps, Camp Rainbow also has Outreach program. Outreach program includes Follow-ups 2 rounds of follow-ups. In a year there will be 2 rounds of follow-ups which are usually one day program. The whole purpose of Follow-up is to continue giving opportunity for children to learn new skills.

Camp Rainbow also caters to young adults living with HIV, in the age group of 18years and 23years, through 'Leaders' in training' (LIT) program. Camp Rainbow Bangalore started LIT program in the year 2015. This is the 5th year LIT program is being conducted. The main purpose of LIT program is to give older adolescents the opportunity to develop leadership skills, learn new skills that are useful for them like Time-management, Problem-solving, Decision-making, Peer Pressure, Sexual and reproductive health etc. and also increase their knowledge on positive living. LIT program is conducted twice in a year. So far 113 young adults have participated in this program

Feedback:

'I learnt many things from camp and with each and everyone in camp. If I can tell specifically it would be time management, supporting others and how to be myself and professional'- **Volunteer**

'I am happy to go to Camp and I learnt so many things that I liked. Most important thing is learnt to take care of ourselves, do not depend on anyone and to take tablets compulsorily. Then I loved to take care of myself and I liked in the camp, taking tablets and making new friends. From the akkas and annas I learnt to take care of myself, taking good food everyday and timely tablets'- **Camper**

'Camp Rainbow is very special. I have learnt a lot specially time-management and special teachings on HIV'-**LIT**

Camp Indicators	Goal	Notes
# of camp sessions	2 sessions	Conducted 2 residential camp sessions for CLHIV
# campers served (not including L.I.T.s)	100 nos	Served 92 children through 2 sessions of residential Camp
# of staff/volunteers	35	Trained 35 staff for Camp
# of training days for staff/volunteers	4.5	Conducted 4.5 day residential training programme for staff

Camp Indicators	Goal	Notes
# of Residential LIT sessions	1	Conducted 1 residential LIT programme for the older adolescents
# L.I.T.s served	15	Served 12 young adults through the residential LIT programme

Outreach Indicators	Goal	Notes
# total outreach sessions	2 rounds of follow-ups, 1 non-residential	Completed 2 rounds of follow-ups with 15 sessions, 1 Residential LIT and. It also includes 1 day camp other than follow-up at Sneha Care home Sarjapur road
# children served (not including LITs)	200(100X2)	518nos. It includes 224campers and 294 non-campers
# L.I.T.s served (Non-Residential LIT)	14	14nos. For the non-residential LIT programme 14 students participated
# L.I.T.s served through Residential LIT programme	12	12nos. About 12 LITs participants were present for the programme
# of staff/volunteers	35 staff	67 camp staff served during the different outreach programmes

- Clinical research in Prevention of mother to child transmission of HIV infection
- Clinical research in Adults with HIV
- Clinical research in children with HIV
- Adolescent Health Education
- Counseling in HIV
- Socio economic aspects of HIV

(a)Assessing the social and emotional development of Children Living with HIV(CLHIV) through a camp approach :

Sylvia Prathiba Thomas, Mercy Priyanka, Glory Alexander

The study is completed. The paper has been written up and sent for publication

Abstract

Objectives: It is important to ensure that children living with HIV(CLHIV) attain an optimum quality of life.This paper presents the outcomes and lessons learnt from two structured therapeutic, recreational, residential summer camps for 125 CLHIV in Bengaluru, South India during 2018-2019.These camps were designed to educate,empower and embolden the children through reflection, fun and recreational activities and learn and rediscover themselves.

Methods: Each camp was of 5-days duration and the core values of Camp were ‘Love, Safety, Respect’. A group of volunteers from nearby colleges were recruited and trained to work under the leadership team of the Camp. Through structured recreational activities both boys and girls from varied backgrounds learnt to rediscover themselves with better self-esteem and confidence. Pre and post camp questionnaires focusing on various characteristics including knowledge of HIV, attitudes to HIV, adherence to Anti Retroviral Therapy, are compared to study impact. A satisfaction and rating scale from campers was also included as part of the evaluation.

Results: Paired t-tests revealed significant improvements in knowledge and attitudes to HIV, including adherence to Anti Retroviral Therapy. Feedback from campers were overwhelmingly positive. Several ideas for more effective intervention were brought out.

Conclusions : . It is concluded that well-planned therapeutic recreation camps for CLHIV are the need of the hour. These Camps significantly empower the children infected by HIV to regain normality and self-esteem, gain proper knowledge and attitudes to HIV and serve as an effective means of restoration of their dignity .

(b)Report on survey of self esteem on school going adolescents.

Joyce Davis, Biju Sebastian, Glory Alexander

The study is complete. Analysis is complete. The report is being written up.

(c)A Study on Quality of life of HIV positive women on long term Anti-Retroviral Treatment (ART):

Glory Alexander, Remya Alan Thomas

Abstract

The study is complete and the paper has been written up and sent for publication

Introduction

Lifelong Anti- Retroviral Therapy (ART) promotes good quality of life and health among HIV positive men and women. However, simplified newer and effective ART have not increased retention in care, or long-term ART adherence, especially among women. There are many factors which impede long term adherence in women. This study measures the Quality of Life (QOL) in women whose ART durations range from one to fifteen years, using the standardized WHO Quality of Life questionnaire.

Material and methods:

One hundred and fourteen women were divided into three groups based on ART duration. Group 1 had 37 women on ART for less than five years, Group-2 had 48 women on ART from 5 to 10 years and Group-3 had 29 women on ART for more than ten years. They were administered the WHO Quality of Life (QOL) questionnaire, which assesses QOL in six domains. QOL was considered poor in scores between 4 - 9.9, medium in scores of 10 -14.9 and good in scores of 15- 20.

Results:

Scores in all 3 groups was more than 85% in five domains and around 74.5% in psychological domain. Domain mean scores were Physical - 18 (CI- 17.63-18.37), Psychological 14.9 (CI- 14.55-15.25), Independence 18.6 (CI-18.33-18.87), Social relationships 17.5(CI 17.07-17.93), Environmental 17.6(CI 17.25-17.95), Spiritual, Religious, Personal beliefs, 17.4 (CI 16.93-17.87). Scores for women on long term ART (Group 3) are no different from the other 2 groups and the p-values were not statistically significant.

Conclusion :

Women on long term ART fare extremely well compared to other groups with more than 93% showing good QOL and none showing poor Quality of Health. Despite a multitude of impeding factors, women who continue ART faithfully and consistently enjoy good quality of health and life. Adequate preparation and supportive health system are essential for ensuring long term adherence, but the attitude and commitment of women are also critical.

(f)Determination of perinatal transmission with 3 drug ARV prophylaxis in breast feeding population in private sector setting in South India**Project period- 2013 -2017**

Investigators-Glory Alexander, Reena Joy, Philimol Philip, Kalpana

Status- Data collection- One hundred and seventy five mothers have been included in the study and the status of the last baby will be known in March 2019.

This study has been extended to October 2020 and a total of almost 280 pregnant women are now included in this study.

PRESS CUTTINGS

मुलांच्या समस्यांवरील प्रशिक्षणाला सुरुवात

४० शाळांतील ८४ शिक्षकांची उपस्थिती; बंगलोर येथील तज्ज्ञ प्रशिक्षकांचे मार्गदर्शन

सकाळ वृत्तसेवा

अकोला, ता. २२ : बालवयातून तारुण्यात पदार्पण करताना मानसिक व शारीरिक बदल होत असतात. तसेच सामाजातील विविध घटकांचाही परिणाम होत असतो. जर पौंगडावस्थेतील मुलांना जीवन कौशल्याचे यथायोग्य ज्ञान दिले तर त्यांच्यातील बहुतांश समस्यांचे निराकरण होऊन त्यांच्यामध्ये सकारात्मक भावनांचा विकास होतो, असे प्रतिपादन प्रभात किड्स स्कूल येथे आशा

फाउंडेशन, बंगलोर द्वारे आयोजित 'अनमोल आशा' या प्रशिक्षण कार्यशाळेच्या प्रथम दिवशी बंगलोर येथील तज्ज्ञ मार्गदर्शकांनी केले. आशा फाउंडेशन, बंगलोर द्वारे आयोजित या तीन दिवसीय कार्यशाळेचे उद्घाटन गुरुवार (ता. २२) करण्यात आले. मूल्य शिक्षण

व जीवन कौशल्य यावर घेण्यात आलेल्या प्रथम सत्रात, बायजुस सेबिस्टीन यांनी मार्गदर्शन केले. जगातील सर्वाधिक विद्यार्थ्यांची घनता भारतात असून त्यापैकी ४८ टक्के विद्यार्थी कुमारवयातील असल्यामुळे त्यांना भेडसविणाऱ्या भावनिक, सामाजिक तसेच शारीरिक

समस्यांचा उहापोह होणे गरजेचे असल्याचे मत बायजुस सेबिस्टीन यांनी यावेळी व्यक्त केले. त्यानंतर इतर मान्यवर वक्त्यांनी जीवन कौशल्य, मूल्य शिक्षण यावरील विविध बाबींवर सखोल मार्गदर्शन केले. कुमारवयीन मुलांच्या समस्यांची उकल करण्यास ही कार्यशाळा महत्त्वपूर्ण ठरेल, असे मनोगत या कार्यशाळेच्या प्रास्ताविकात प्राचार्य कांचन पटोकार यांनी व्यक्त केले. तत्पूर्वी आशा फाउंडेशनचे तज्ज्ञ मार्गदर्शक जॉयस डेव्हीस, बायजुस सेबिस्टीन, वृषाली गावंडे, भारती मोझेइ, तारिनी विल्सन, माया सिंग

व जेरनस यांचे स्वागत प्रभातचे संचालक डॉ. गजानन नारे व वंदना नारे यांचे हस्ते करण्यात आले. या वेळी प्रभातचे बालसमुपदेशक डॉ. प्रदीप अवचार प्रामुख्याने उपस्थित होते. उद्घाटनपर सत्राचे संचालन मौता इंगळे यांनी केले. या तीन दिवसीय मोफत कार्यशाळेत जिल्ह्यातील ४० शाळांतील ८४ शिक्षक सहभागी झाले असून, कुमारवयीन विद्यार्थ्यांच्या समस्या व त्या समस्यांचे निदान यावर विचारमंथन व उपाययोजना या कार्यशाळेत होणार आहे.

दिव्य मराठी विशेष • पौगंडावस्थेतील मुलांना यथायोग्य ज्ञान द्यावे, ८४ शिक्षकांचे विशेष प्रशिक्षण सुरू

समस्या निवारणातून घडतात सकारात्मक बदल

प्रतिनिधी । अकोला

यालवयातून तारुण्यात पदार्पण करताना मानसिक व शारीरिक बदल होत असतात. तसेच सामाजातील विविध घटकांचाही परिणाम होत असतो. जर पौगंडावस्थेतील मुलांना जीवन कौशल्याचे यथायोग्य ज्ञान दिले तर त्यांच्यातील बहतांश समस्यांचे निराकरण होऊन त्यांच्यामध्ये सकारात्मक भावनांचा विकास होतो, असे प्रतिपादन प्रभात किड्स स्कूल येथे आशा फाउंडेशन, बंगळूरु द्वारे आयोजित 'अनमोल आशाए' या प्रशिक्षण कार्यशाळेच्या प्रथम दिवसी बंगळूरु येथील तज्ज्ञ मार्गदर्शकांनी केले.

आशा फाउंडेशन, बंगळूरु

प्रशिक्षण कार्यशाळेच्या पहिल्या दिवशी सहभागी झालेले शिक्षकवृंद.

द्वारे आयोजित या तीन दिवसीय कार्यशाळेचे उद्घाटन गुरुवार, २२ ऑगस्ट रोजी करण्यात आले. मूल्य शिक्षण व जीवन कौशल्य यावर घेण्यात आलेल्या प्रथम सत्रात, वायजुस सेविस्टीन यांनी मार्गदर्शन केले. जगातील सर्वाधिक

विद्यार्थ्यांची घनता भारतात असून त्यापैकी ४८ टक्के विद्यार्थी कुमार वयातील असल्यामुळे त्यांना भेडसावणाऱ्या भावनिक, सामाजिक तसेच शारीरिक समस्यांचा उहापोह होणे गरजेचे असल्याचे मत वायजुस सेविस्टीन यांनी यावेळी व्यक्त केले.

कुमारवयीन विद्यार्थ्यांच्या समस्यांवर विचारमंथन

या तीन दिवसीय मोफत कार्यशाळेत जिल्ह्यातील ४० शाळांतील ८४ शिक्षक सहभागी झाले असून, कुमारवयीन विद्यार्थ्यांच्या समस्या व त्या समस्यांचे निदान यावर विचारमंथन व उपाययोजना या कार्यशाळेत होणार आहे.

त्यानंतर इतर मान्यवर वक्त्यांनी जीवन कौशल, मूल्य शिक्षण यावरील विविध बाबींवर सखोल मार्गदर्शन केले. कुमारवयीन मुलांच्या समस्यांची उकल करण्यास हा कार्यशाळा महत्त्वपूर्ण ठरेल असे मनोगत या कार्यशाळेचे उद्घाटनपर

प्रास्ताविकात प्राचार्य कांचन पटोकर यांनी व्यक्त केले. तत्पुर्वी आशा फाउंडेशनचे तज्ज्ञ मार्गदर्शक जॉयस डेव्हीस, वायजुस सेविस्टीन, वृषाली गावंडे, भारती मोझे, तारिनी विल्सन, माया सिंग व जेरेनस यांचे स्वागत प्रभातचे संचालक डॉ. गजानन नारे व सौ. वंदना नारे यांचे हस्ते करण्यात आले. या वेळी प्रभातचे बाल समुपदेशक डॉ. प्रदीप अवचार प्रामुखाने उपस्थित होते.

उद्घाटनपर सत्राचे संचालन मौता इंगळे यांनी केले.

कुमारवयीन मुलांना शिकवणाऱ्या शिक्षकांना अशा मुलांच्या समस्यांची जाणीव आणि करावयाच्या उपाययोजनांवर विशेष मंथन होणार आहे.

बालवयातून तारुण्यात पदार्पण करताना मानसिक व शारीरिक बदल होत असतात. तसेच सामाजातील विविध घटकांचाही परिणाम होत असतो. जर पौंगडावस्थेतील मुलांना जीवन कौशल्याचे यथायोग्य ज्ञान दिले, तर त्यांच्यातील बहुतांश समस्यांचे निराकरण होऊन त्यांच्यामध्ये सकारात्मक भावनांचा विकास होतो, असे प्रतिपादन प्रभात किड्स स्कूल येथे आशा फाउंडेशन, बंगळूरुद्वारे आयोजित 'अनमोल आशाए' या प्रशिक्षण कार्यशाळेच्या प्रथम दिवसीय बंगळूरु येथील तज्ज्ञ मार्गदर्शकांनी केले.

आशा फाउंडेशन, बंगळूरुद्वारे

आयोजित या तीन दिवसीय कार्यशाळेचे उद्घाटन गुरुवार, २२ ऑगस्ट रोजी करण्यात आले. 'मूल्य शिक्षण व जीवन कौशल्य' यावर घेण्यात आलेल्या प्रथम सत्रात, बायजुस सेबिस्टीन यांनी मार्गदर्शन केले. जगातील सर्वाधिक विद्यार्थ्यांची घनता भारतात असून, त्यापैकी ४८ टक्के विद्यार्थी कुमारवयातील असल्यामुळे त्यांना भेडसविणाऱ्या भावनिक, सामाजिक तसेच शारीरिक समस्यांचा ऊहापोह होणे गरजेचे असल्याचे मत बायजुस सेबिस्टीन यांनी यावेळी व्यक्त केले. त्यानंतर इतर मान्यवर वक्त्यांनी जीवन कौशल, मूल्य शिक्षण यावरील विविध बाबींवर सखोल मार्गदर्शन केले. कुमारवयीन मुलांच्या समस्यांची उकल करण्यास ही कार्यशाळा महत्त्वपूर्ण ठरेल, असे

मनोगत या कार्यशाळेचे उद्घाटनपर प्रास्ताविकात प्राचार्य कांचन पटोकार यांनी व्यक्त केले. तत्पूर्वी आशा फाउंडेशनचे तज्ज्ञ मार्गदर्शक जॉयस डेव्हीस, बायजुस सेबिस्टीन, वृषाली गावंडे, भारती मोझेझ, तारिनी विल्सन, माया सिंग व जेरनस यांचे स्वागत प्रभातचे संचालक डॉ. गजानन नारे व वंदना नारे यांचे हस्ते करण्यात आले. बालसमुपदेशक डॉ. प्रदीप अवचार प्रामुख्याने उपस्थित होते. उद्घाटनपर सत्राचे संचालन मीता इंगळे यांनी केले. या तीन दिवसीय मोफत कार्यशाळेत जिल्ह्यातील ४० शाळांतील ८४ शिक्षक सहभागी झाले असून, कुमारवयीन विद्यार्थ्यांच्या समस्या व त्या समस्यांचे निदान यावर विचारमंथन व उपाययोजना या कार्यशाळेत होणार आहेत.

HIV/AIDS patients still fight stigma

Asha Foundation

Asha Foundation runs a helpline for patients (2354 3333/

2354 2222) that works from 9 am to 5 pm, Monday to Friday.

Dr Glory Alexander, founder, says the foundation receives five to 15 calls a day and about 1,700-1,800 calls a year. Most calls are from people who are at risk and want to know what to do and how to test for AIDS.

"Some call for information and others to know about care and help for the infected," she says.

The foundation provides counselling on many aspects, including how to remain HIV- and prevent transmission of AIDS from mother to child.

It holds awareness programmes among Metro construction employees, contract labourers and mill workers, and provides medical, nutritional and educational support for HIV+ affected children and their siblings.

Every year, Asha Foundation hosts Camp Rainbow for children between 10 and 16.

"These are children who have grown up with stigma and discrimination. We teach them life skills, team-building skills, health and hygiene," she says. Children from Mandya, Mysuru, Tumkur, and Kolar are included in the camp.

Prevention of transmission of HIV from mother to child is an area of focus.

Glory says the programme has been effective. "Without treatment, there is a 45 per cent chance of trans-

mission of HIV to a newborn child but this can be brought down to less than 5 per cent," she explains.

The foundation provides training for teachers at three-day workshops. Each teacher is given resource manual to teach students in the age group of 13 to 16.

The manual consists of lessons about friendships virtual and real, infatuation and love, marriage, and sexual intimacy, and medical topics like HIV/AIDS, STDs, alcohol and drug abuse and smoking.

Children with volunteers wearing masks they made at a camp hosted by Asha Foundation.

ANNEXURE II

Feedback from teachers, students and parents on ASHA Foundation's Adolescent Health Education (AHE) Program

Impact of the AHE program- Feedback from the teachers

I am a maths teacher; and good in teaching maths. I was very strict so my children didn't like that much.

I attended the ASHA workshop in 2016. From 2017, I started teaching the curriculum. I have noticed a wonderful change. The students have started loving me more than before. They share many of their problems with me and am able to guide them.

Thank you ASHA team
Mariamma Thomas,
Nirmala Convent school.

Hello ASHA Team,

I am still remembering the 3 days workshop. It was so nice. Remember Joyce Madam's skit, dance, Bharathi Madam's story, Bethesa madam's inspiring classes. I attended the workshop in 2015.

We are able to do the curriculum very well. These students are really liking the way we teach.

Thank you very much.
Shubra Lahiri.

Feedback from students

Myself Sakshi Pawar (X B) NIRMALA CONVENT SCHOOL. When I started last year academic sessions, I had a lot of problems. I could not concentrate in my studies. I was too shy and doubtful and my bodily changes were embarrassing me a lot.

It was that time Ma'am you taught me the lessons on Physical Developments by using some activities and games. I was really happy to attend your classes.

I came to know what all changes in me are common and there is nothing to worry.

Now am happy, and good in my studies.

Hai Swati Madam,
Greetings From Aswathi.

The lockdown situation really boring us. We wanted to come to school as early as possible. We remember your classes, especially classes of value education.

Convey our regards to ASHA foundation, Bangalore.

Aswathi Nair
PDEA school, Akurdi, Pune.

In my life I have chose friends on the basis of thier qualities like the most intelligent, most beautiful, best sportsman etc... That had given lots of bad experiences in my life. Ma'am, when u taught me How to choose friends that had changed my friend circle. Now am happy with my friends.

Love you teacher

Ashmeera S. Dhepe

6th f roll no. 8

School of scholars

Thank you Deshmukh Sir for giving a wonderful lesson on 6 who am I'. Earlier I was always thinking that I am not good for anything. My Pappa and my Mummy always tells me that I am not doing things like my neighbour children does. But now I am feeling that I am good. I am worth, I am able

Thank you Deshmukh Sir,

yours Obidient student,
Parth Patil

10th A 10036

St. Francis High School, Amt.

Feedback from Parents

Student Response from Chikhaldara:

Dnyanesh Kirkate, Std VIII, Govt. Ashram School. Doma, chikhaldara.

“In value education class, I learnt that how we are different from others. If someone is labelling us or teasing us, we should not pay attention to them., rather we should improve on our habits then only we can be successful in our life. thank you madam.”

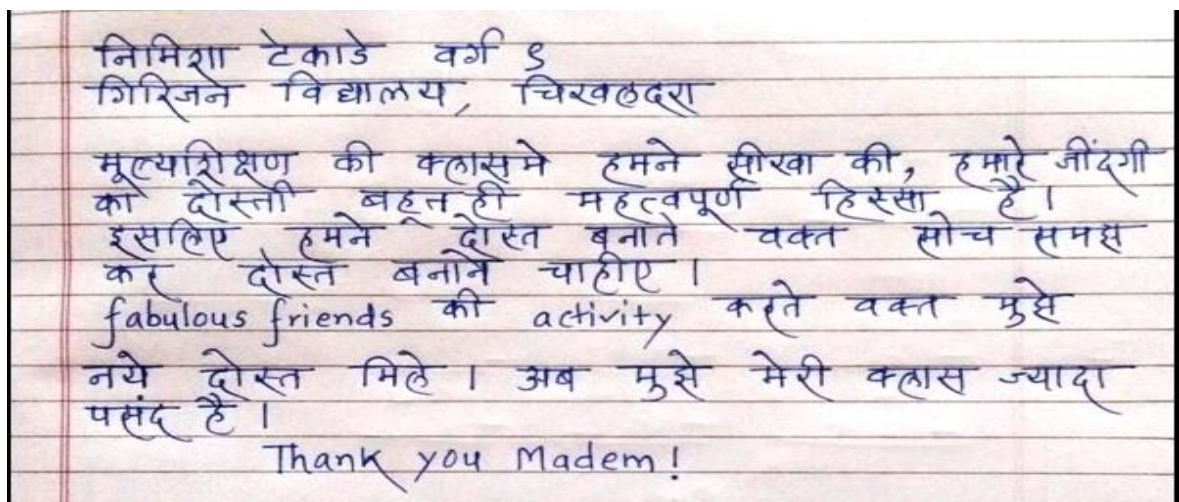

Translated in English

Arpit Raghuwashi, Std X, Tanaji Malusare Vidyalaya, Koylari, chikhaldara.

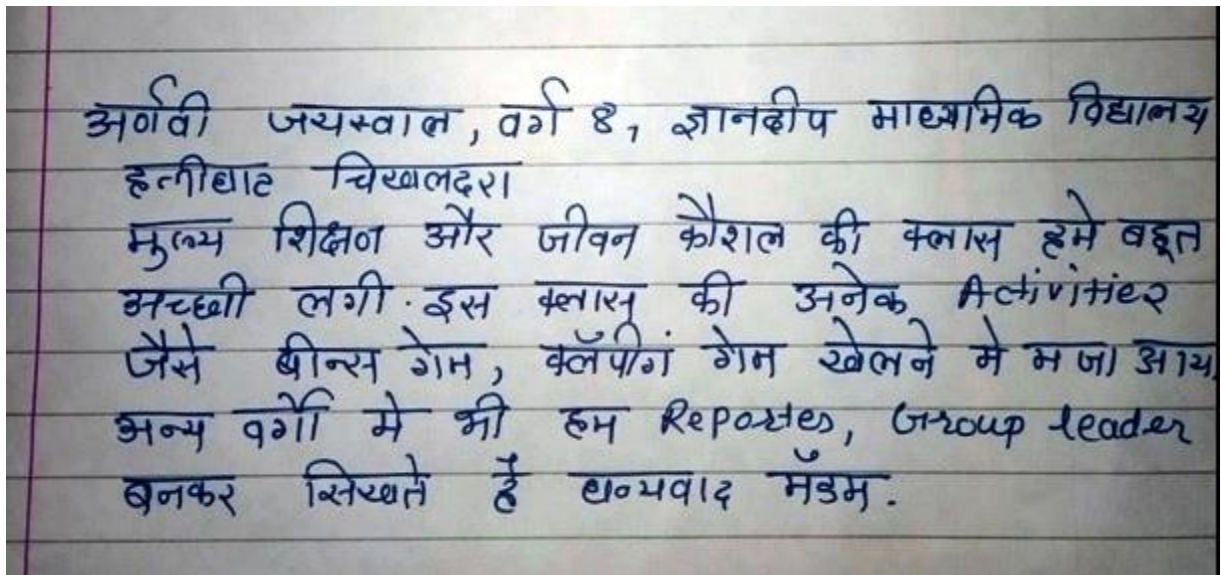

“Respected Sir,

You taught how we all are unique. Our habits, nature, the way we talk, the way we study everything is different that's why we should not compare with anyone else. If someone is comparing us, then we should not feel bad about it. In this class I learn so many good habits. thank you sir”

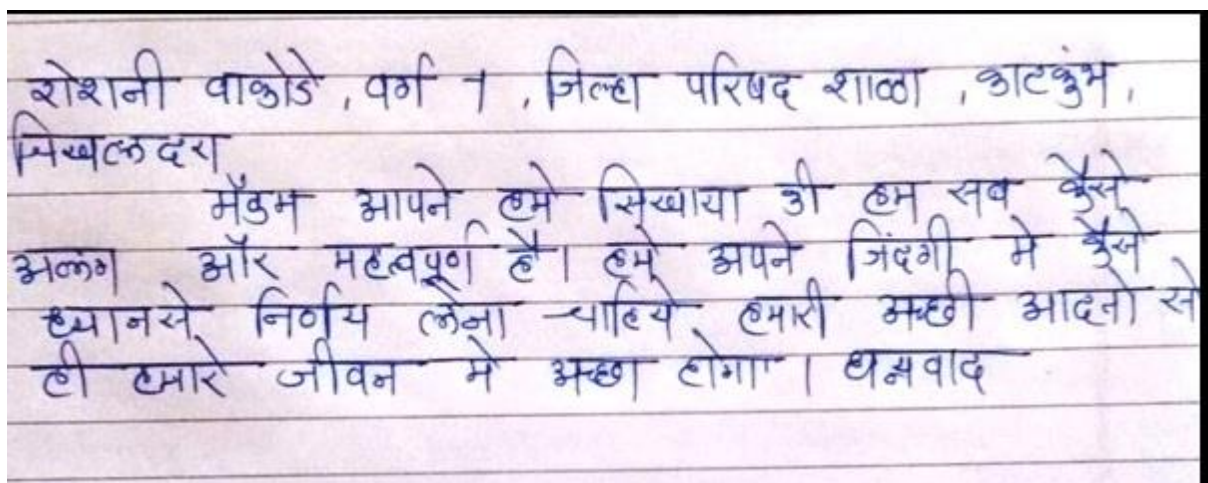

Nimisha Tekade, Std ix, Girijan Vidyalaya, chikhaldara.

“In value education class I learnt that friendship is one of the most important part of our life therefore we should choose our friends wisely. In fabulous friend's activity I got many new friends. now I like my class very much. Thank you madam.”

Arnavi Jayswal, StdVIII, Dnyandeep madhyamik vidyalaya,Hattighat , chikhaldara.

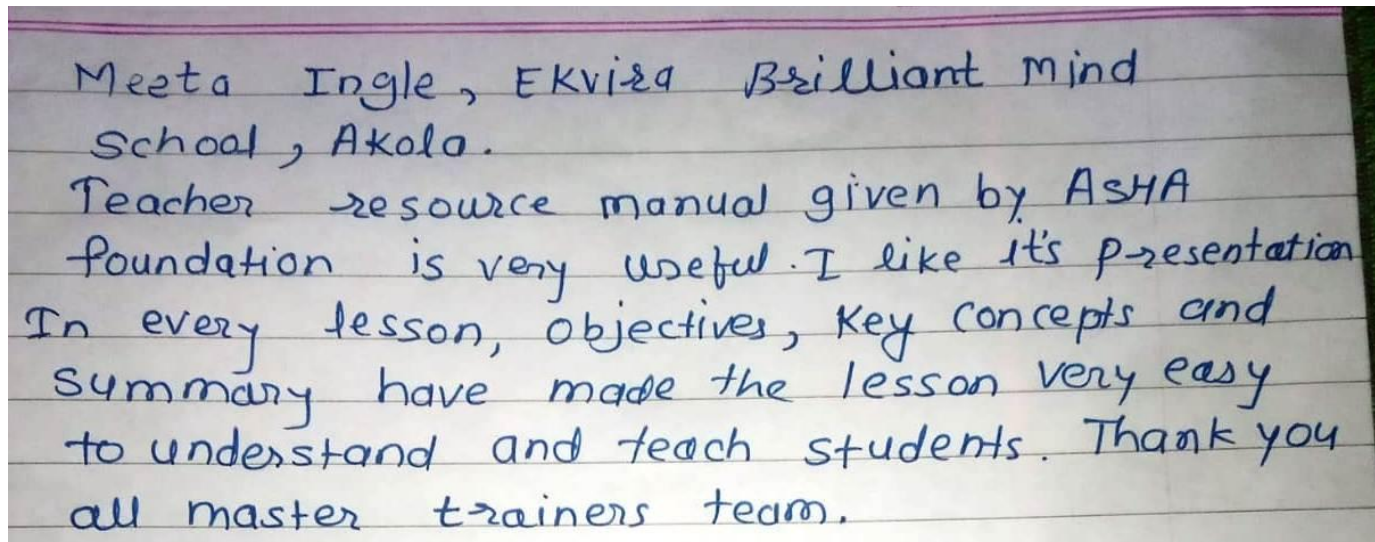

“We like this value education and life skill class very much. from this class, we like various activities like beans game and clapping games. In other classes also we use skill cards like reporter and group leaders. thank you madam”

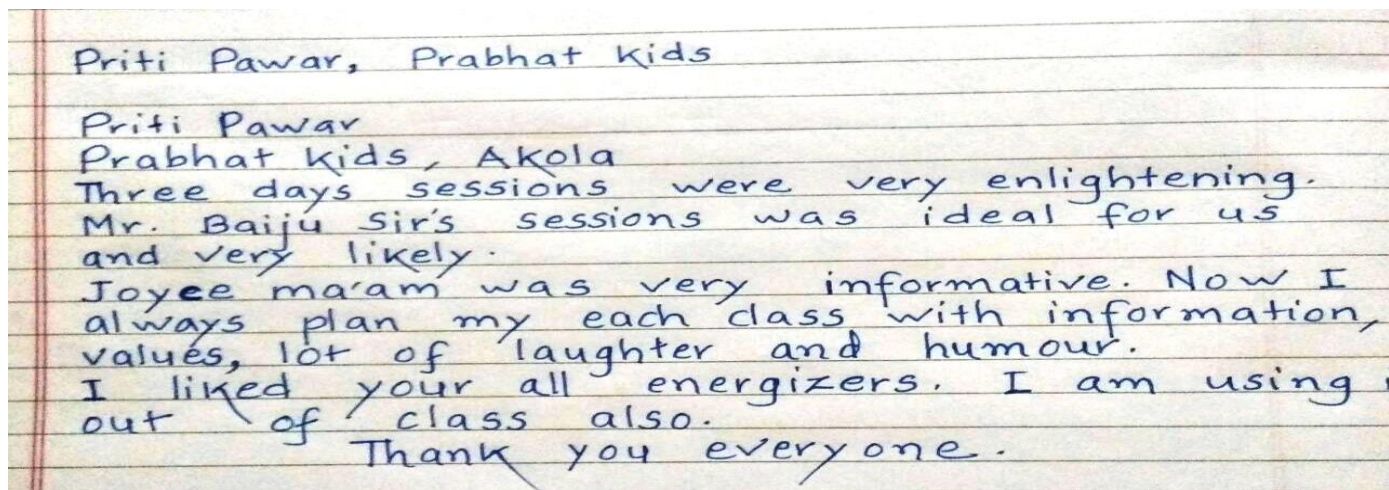

Roshani Wakode, Std VII, Zilla Parishad school, Katkumbh, Chikhaldara.

“Madam you teach me that how everyone's life is valuable and important so we all need to take decisions of our life very cautiously. Our good habits only will lead our life to a success, thank you.

Teachers Response:

Meeta Ingle, Ekvira Brilliant Mind School, Akola.
Teacher resource manual given by ASHA foundation is very useful. I like its presentation. In every lesson, objectives, key concepts and summary have made the lesson very easy to understand and teach students. Thank you all master trainers team.

Priti Pawar, Prabhat Kids
Priti Pawar
Prabhat Kids, Akola
Three days sessions were very enlightening. Mr. Baiju Sir's sessions was ideal for us and very likely.
Joyee ma'am was very informative. Now I always plan my each class with information, values, lot of laughter and humour.
I liked your all energizers. I am using it out of class also.
Thank you everyone.

Shital Kawade, Bhikamchand Khandelwal
School Akola.

In Asha Foundation's teachers training program we learnt many things required for teaching students I liked parenting communication style most. We get live examples of different parents reacting with their children. We understand very easily what to do and avoid. Being a parent and teacher, your whole content is helpful and guiding to me. Thank you Asha Foundation.

Student Response from Akola :

Vivaan Khateji class 7th, Vidyanchal School
Akot, Dist. Akola

I like your value education class. We understand many important values through different activities. In your lesson "Who am I?" I learnt that we are special, unique and have various different specialities. Thank you Sir.

Aashna Tank, class 8, Ekvira Brilliant mind
School, Akola.

Dear Sir,

you taught us how unique and valuable
we are you taught us about Friend-ship. We
realise how much friends are important in our
daily life. We share every-thing of our daily life
with them. Therefore we must be
cautious while selecting friends.

Yug Jagmalani, Class 8, School of Scholars,
Hingana Road, Akola

Dear Madam,

I have realised that we are
unique and have various, different features,
we have some similarities and some
differences also. So we cannot be
compared with anyone else. Thank you
for your valuable guidance.

preet Bydharni, class 9, Bhikamchand
Khadelwa vidyalaya, Akola.

Dear madam,

In your value education class,
the most important thing I learnt is
"Golden Broom Rule". I make its
chart in my room which I can see
everyday. Many good and new
habits I learnt from this class.
Thank you

Paymak Sahoo, class 10. Prabhat kids school
Washim Road, Akola.
Dear madam.

Earlier I was having few
disputes with my parents. They used to
scold me frequently. After your class
on character education, & life skills,
I understand my parent's intention
behind their possessiveness and continuous
follow ups. Parents always want their
kids to be successful and happy.
Thank you.
